EDUCATION

National Institute of Technology Jamshedpur

Sep 2024 – May 2028

B.Tech - Production and Industrial Engineering

Hellens School, Sitamarhi

April 2021 – April 2023

Intermediate - 85 %

PROJECTS

Capsule – Time-Based Content Access Platform | *Django, DRF, PostgreSQL, JWT*

- Designed backend REST APIs for time-locked digital capsules
- Implemented JWT authentication and role-based authorization
- Built secure unlock mechanism using server-side timestamp validation
- Implemented custom permissions and input validation
- Developed CRUD APIs with serializers, pagination, and permissions
- Integrated backend with deployed frontend and tested via Postman
- Live: capsule-frontend-peach.vercel.app

Secure File Sharing Platform | *Django, DRF, PostgreSQL, JWT, Cloudinary*

- Built production-ready secure file sharing system (5MB image/video)
- Implemented UUID-based share links with expiry, download limits, password protection
- Enforced ownership-based access control using JWT and custom permissions
- Handled concurrency using atomic validation to prevent race conditions
- Deployed backend on Render and frontend on Vercel
- Live: file-sharing-frontend-tau.vercel.app

ACHIEVEMENTS

- Won **1st Prize** in **M-CODE** event at **Metallum 7.0**, a national-level symposium organized by IEST Shibpur (Feb 2026)
- Solved 400+ DSA problems across coding platforms
- Strong debugging and backend API validation
- Hands-on experience with deployment (Render, Vercel)
- Actively learning scalable backend system design

TECHNICAL SKILLS

Languages: Python, Java, C++

Frameworks: Django, Django REST Framework

Databases: PostgreSQL, SQLite

Tools: Git, GitHub, Postman, Cloudinary

Concepts: REST APIs, JWT Authentication, OOP, DSA

LANGUAGES

- English, Hindi
