Summary

Second-year undergraduate at **National Institute of Technology Jamshedpur** with hands-on experience in backend development using **Django and Django REST Framework**. Experienced in building RESTful APIs, implementing authentication, and solving **300+ Data Structures & Algorithms problems**. Seeking a **Software / Backend Developer Internship**.

Education

National Institute of Technology Jamshedpur

Bachelor of Technology in Production and Industrial Engineering

Sep. 2024 – May 2028

Jamshedpur, Jharkhand

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Python
- Object-Oriented Programming
- Java
- Discrete Mathematics

Projects

Capsule – Time-Based Content Access Platform | *Python*

January 2026

- **Tech Stack:** Django, Django REST Framework, PostgreSQL, JWT,
- Designed and developed backend REST APIs for creating and managing time-locked digital capsules.
- Implemented JWT-based authentication and role-based authorization.
- Built CRUD APIs with serializers, pagination, and permission handling.
- Integrated backend APIs with frontend deployment and tested using Postman.
- Live: capsule-frontend-peach.vercel.app
- GitHub: Project Repository

Secure File Sharing Platform | *Python*

January 2026

- **Tech Stack:** Django, Django REST Framework, PostgreSQL, JWT
- Designed and built a production-deployed secure file sharing system for image and video uploads ($\leq 5\text{MB}$).
- Implemented UUID-based public share links with expiry time, download limits, optional password protection, and instant revocation.
- Enforced ownership-based access control using JWT authentication and custom API permissions.
- Handled concurrent download requests safely using atomic access validation to prevent race conditions.
- Integrated Cloudinary for scalable media storage; deployed backend on Render and frontend on Vercel.
- Followed clean backend architecture by separating validation, access control, and file delivery logic.
- Live: file-sharing-frontend-tau.vercel.app
- GitHub: Project Repository

Technical Skills

Languages: Python, Java, C++

Frameworks: Django, Django REST Framework

Databases: PostgreSQL, SQLite

Tools: Git, GitHub, Postman

Concepts: REST APIs, JWT Authentication, OOP, Data Structures & Algorithms

Achievements & Additional

- Solved **400+ Data Structures & Algorithms problems** across multiple coding platforms
- Strong debugging skills with hands-on experience in API testing and backend validation
- Familiar with collaborative development workflows using Git and GitHub
- Actively learning scalable backend system design and deployment fundamentals
