PROJECTS

Capsule – Time-Based Content Access Platform

Django, Django REST Framework, PostgreSQL, JWT

- Designed backend REST APIs for time-locked digital capsules.
- Implemented JWT authentication and role-based authorization.
- Built a secure capsule unlock mechanism based on server-side timestamp validation.
- Implemented input validation and custom permission classes for controlled access.
- Built CRUD APIs with serializers, pagination, and permissions.
- Integrated backend with deployed frontend; tested using Postman.
- Live: capsule-frontend-peach.vercel.app

Secure File Sharing Platform

Django, DRF, PostgreSQL, JWT, Cloudinary

- Built production-deployed secure file sharing system (≤ 5 MB image/video).
- Implemented UUID-based share links with expiry, download limits, password protection, and revocation.
- Enforced ownership-based access control using JWT & custom permissions.
- Prevented race conditions using atomic validation for concurrent downloads.
- Deployed backend on Render & frontend on Vercel.
- Live: file-sharing-frontend-tau.vercel.app

EDUCATION

National Institute of Technology Jamshedpur — B.Tech — Production & Industrial Engineering

Sep 2024 – May 2028

Hellens School, Sitamarhi — Intermediate

April 2021 – April 2023

SKILLS

Languages: Python, Java, C++

Frameworks: Django, Django REST Framework

Databases: PostgreSQL, SQLite

Tools: Git, GitHub, Postman

Concepts: REST APIs, JWT Authentication, OOP, DSA

ACHIEVEMENTS

Won 1st Prize in M-CODE event at Metallum 7.0, a national-level symposium organized by IEST Shibpur

Solved **400+** DSA problems across coding platforms

Strong debugging & backend API validation experience

Hands-on experience with deployment (Render, Vercel)

Actively learning scalable backend system design

LANGUAGES

English, Hindi
